How to install the Plugin for Premiere Pro?

MacOS

1. Close Adobe Premiere Pro.

2. Open the .pkg file follow through the installation process.

3. Restart Adobe Premiere Pro.

4. You can open the plugin in the Premiere Pro menu under "Window > Extensions > Timeline to Clip Marker Converter

If you want to install a new version of the plugin you can simply run the new installer. It is not necessary to uninstall the old version, the new one will overwrite everything necessary.

Windows

1. Close Adobe Premiere Pro.

2. Start the .exe installer and follow the installation instructions. The Windows installer requires admin rights.

3. Restart Adobe Premiere Pro.

4. You can open the plugin in the Premiere Pro menu under "Window > Extensions > Timeline to Clip Marker Converter

5.

Uninstall:

The plugin can be easily uninstalled under "Add/Remove Programs".

Update note:

If you want to install a new version of the plugin you can simply run the new installer. It is not necessary to uninstall the old version, the new one will overwrite everything necessary.

ZXP file

It is possible on both MacOS and Windows to install the plugin using the ZXP file. This requires a ZXP installer. We recommend the installer from aescripts. (ZXP Installer - aescripts + aeplugins - aescripts.com)
